Walid et al:

It was nice meeting with you and your staff today. I believe that the meeting helped you understand what the issues and difficulties involved with this site. The EPA is attempting to remedy a problem for the City of Houston and its citizens. The action we are taking is considered a time critical removal action due to the imminent and substantial endangerment to the surrounding population caused by the chemicals located on the facility.

I appreciate any assistance you can provide to protect the citizens of the City of Houston from the potential exposures.

Thank you for your time.

Gary Moore
